**Subject:** Re: Apex Town Commissioners Meeting

Dear Gerald,

I apologize for the delay in my response. I tried to state my position regarding the resolution during the town board meeting. I do agree with most of the content, and as is mentioned in the minutes of the meeting, I have been working to persuade members of the Cary council and the consultants to consider other sites. I will continue to pursue these options with them, but did not think putting them on the defensive with a resolution was the right thing to do at the time. Hopefully, there will be something to report in a couple of weeks.

Sincerely,

Mike Jones

**Subject:** FW: Apex Town Commissioners Meeting

Dear Commissioners and Mayor of Apex,

The status of my request for you to state your position on why you refuse to support a resolution to continue the site selection process for the New Hill sewage plant is shown below:

Commissioner Jensen - thank you for your response

Commissioner Schulze - thank you for committing to state your position

I have not received any response, either negative or positive, from the following:

Commissioner Gossage - no response

Commissioner Jones - no response

Mayor Weatherly - no response

I continue to believe the citizens of New Hill deserve a response to my question in the note below.

I also believe the citizens of Apex deserve to see how their elected officials act when their actions/decisions are questioned. Silence in a public forum is not a response.

Respectfully,

Gerald W. Gunter

**Subject:** Apex Town Commissioners Meeting

Dear Mike,

I had my first opportunity to attend a Apex Town Commissioner Board Meeting last evening. I must admit up front that I was extremely disappointed in the position of most of the town commissioners, you included, for not supporting the resolution proposed by Bill Jensen.

I don't think I've seen a more close minded group of leaders, even including Cary's board. Most of you acted as if you'd rather be someplace else.

How long can you hide behind, and use excuses like 'processes', gag orders, and play the role of allowing 'big brother' (Cary) to pull the puppet strings??? You know at well as I do that DENR is going to only look at the 3 sites that Cary is submitting at part of the EIS.

For God's sake, we've been your neighbors, attended your schools and churches, shopped at your stores, and been proud to have been a part of Apex for many, many years. Why is the Apex leadership turning their backs to us now?

**Mr. Jensen did not request that you abandon the current plans. He asked that you support a parallel effort to investigate other site alternatives. That is a very minimal request considering the damage that can, and will be done to our community if this continues.**

Mr Schulze indicated that you all voted to support the 'process'. The process is broken! The manipulation that has occurred by Cary is blatant and obvious. Show the people of New Hill that you have the integrity, character, and willingness, to do your part to correct these problems before it's too late.

**Please respond to this email by explaining the reasons you can not support the citizens of New Hill on this issue.**

Thank you,

Jerry Gunter
