Arrogant behavior

Citizens of Apex, when are you going to wake up? When are you going to recognize the arrogance of your town leaders? When are you going to rectify their wrong doings?

Your town, along with Cary, Holly Springs and Morrisville, is running over your small neighbor, New Hill. They are planning to build a 30 million-gallon sewage plant right in the center of our community. They have made a sham of the public information process by intentionally suppressing information and proceeding with the building of infrastructure even though they have no permit for the project. They have already laid a water line to New Hill, under the guise of supplying their fire station. They have already condemned land for a power line from Apex to power the sewage plant even though there are Progress Energy power lines already here and on the sewage plant site. The cost of these projects is born by you, the taxpayers of Apex. Are you aware that your tax monies are going for these projects five miles from your city limits? Do you care that they are spending your money like this? Are you aware that they are now dumping water from that water pipeline at a rate of about 2 gallons a second to keep it from stagnating? That's 172,000 gallons of water a day that your tax money paid to treat, pump to New Hill and dump on the ground. This dumping will be necessary until there is another use for this water. If this waste of your hard-earned money concerns you, call your town board members and your fine mayor and tell them.

Wayne Womble, New Hill
