Dear Mayor McAllister,

I was in attendance tonight and listened very carefully to your comments about the condemnation proceedings. I feel you deceived the council, and the members of the public in attendance, when you alluded to the fact that you met with us yesterday and answered all our questions and addressed our concerns.

In reality, as you recall, there was much information you committed to give us that has not been delivered.

1. Documentation that bridges the information in Tech. Memo 8.0 to Tech Memo 8.1 that justified selection of site 14 (or site C). We all agreed there must be more information than what has been released.
2. Information supporting the \$20 million extra cost to cross US # 1 and use PE property I was also shocked to hear tonight that the amount is now \$27 million.

This was not the finest hour for democracy in action.

Jerry Gunter
