

THE PROCESS AND NEW HILL

Circa 60AD, a process took place within the Roman Empire that cumulated with the burning of Rome while Nero played his lyre (fiddle). In 1918 a process took place in Russia that cumulated with the absolute control of Russia by the communist party and with the murder of millions of people in a tyrannical society. In the 1930's a process took place in Germany that lead to Nazi domination of Germany, World War II and the holocaust.

Today in Wake County there is a "process" taking place that may result in Cary, Apex and Morrisville placing a sewage plant in the heart of New Hill. Cary, Apex and Morrisville have the power to place this sewage plant in New Hill by means of following the "process". But is the "process" equitable, or is it broken? Just because towns have the power to condemn property in another community, should they wield the sword and ruin a community that has few alternatives for fighting back?

There are other locations where this sewage plant may be placed that will have far less impact on New Hill. It may cost 2% or 10% more money to minimize the negative impact of the sewage plant, but isn't this endeavor also the responsibility of the towns that construct the sewage plant?

Placing this sewage plant in the heart of New Hill will forever inhibit the development of this community and will negatively impact the quality of life for folks in the area. Cary, Apex and Morrisville must be open to considering all reasonable alternatives as requested by our neighbors in New Hill.

I speak for myself.

Bill Jensen
