Subject: WWTP Position

Mr. Gunter -

The siting of a waste water treatment plant is an extremely complicated process and beyond the expertise of anyone in the Western Wake Partnership. Because of these complexities, the Partnership hired experts in the industry to help determine the best location. I believe that if we are going to spend tax-payer dollars to hire experts, we should listen to these experts. Otherwise, why hire them to begin with?

The reason I did not support the resolution brought forth by Commissioner Jensen is because doing so would indicate a lack of confidence in the site selection process. This is not the case. I am confident that the process agreed to by the partnership has worked and continues to work. I will be happy to listen to anybody that can provide a better site as measured against the criteria set up by the Partnership.

Respectfully Yours,

Gene Schulze

Commissioner

Town of Apex
